NATUREWORKS "PLA" CONTAINERS & LIDS by SABERT

These containers and lids are made from 100% annually renewable resources. PLA stands for Polylactide, a versatile polymer produced by NatureWorks LLC. NatureWorks PLA is compostable under specific conditions. Composting is a method of landfill diversion that allows organic materials to be recycled into a product that can be used as a valuable soil amendment.

TORKMATIC TOWEL DISPENSER & ADVANCED HAND TOWEL ROLLS by SCA

TOWEL: Soft, strong, and highly absorbent Tork Roll Towel offers the perfect combination of quality, performance, and value. Embossing enhances hand feel and maximum absorbency; fewer towels are used per hand dry. Long lasting rolls minimize maintenance costs while maximizing service. Towels are made from 100% recycled fiber provides environmental benefits, and a positive image.

DISPENSER: Tork Matic is a portion controlled, mechanical hands-free dispensing system for roll towels that provides hygienic dispensing without the need for handles or levers. The user touches only the towel needed - reducing the risk of cross-contamination. Reliable and durable, Tork Matic delivers one towel, time after time, always ready to service the next patron.

by Spartan Chemical

According to the Farm Security and Rural Investment Act (FRSIA) a biobased product is a product determined by the US Secretary of Agriculture to be to be a commercial or industrial product (other than food or feed) that is composed, in whole or in significant part, of biological products or renewable domestic agricultural materials (including plant, animal, and marine materials) or forestry materials. In general a biobased product is formulated with domestic products from renewable plant and animal resources. Biobased products are thought to be excellent alternatives to products made from petroleum.

BioRenewables are made with ingredients that are derived from domestic agricultural and forestry materials. Whether it's a soy based solvent, vegetable derived detergent or cleaning agent made from coconut oil, each ingredient comes from a renewable resource. This means that the raw components Spartan is using are constantly being grown, produced and manufactured into solvents, detergents, etc. These renewable items provide products that are environmentally safer, increase rural economic development, foster domestic production of our resources and reduce US dependency on imported products.

Green Seal is an independent, on-profit organization that strives to achieve a healthier and cleaner environment by identifying and promoting products and services that cause less toxic pollution and waste, conserve resources and habitats, and minimize global warming and ozone depletion. Green Seal has no financial interest in the products that it certifies or recommends or in any manufacturer or company. Green Seal's evaluations are based on state-of-the-art science and information using internationally recognized methods and procedures. Thus, Green Seal provides credible, objective, and unbiased information whose only purpose is to direct the purchaser to environmentally responsible products and services.

Green Solutions Neutral Disinfectant Cleaner is a neutral pH quaternary disinfectant cleaner formulated to kill a broad spectrum of microorganisms. Green Solutions Neutral Disinfectant Cleaner deodorizes hard-to-keep-fresh-smelling areas such as garbage storage areas, empty garbage bins and cans, toilet bowls, and other areas that are prone to odors caused by microorganisms. Cleans most any surfaces that are non-porous.
